

COUNCIL DECIDES TO RESIGN FROM SWIMMING LEAGUE

Association's Vote to Discard
Amateur Rule Prompts
Drastic Action

FIGHTS FOR AMATEURISM

Continuing its constant battle to maintain amateurism in intercollegiate amateur competition, Technology voted to resign from the New England Swimming Association since that body no longer includes an amateur rule in its constitution. This decision was reached at an Advisory Council on Athletics meeting at the Engineers' Club last night.

All accredited amateur athletic associations have very definite statements concerning a man's requirements before he is accepted as a competitor. The swimming governing body now accepts any man who is certified by the institution he represents. This allows any man to compete, provided his college is willing, regardless of how lax that college's rules may be.

To Show Major's Portrait

A portrait of Frank H. Briggs '31, who is known as the "Father of Technology Athletics," will be shown at some future date in the Dean's office. "The Major" was the first chairman of the Advisory Council, and it is through his efforts that management of athletics at Technology is a strictly student function.

Squash should be dropped as a substitution for Physical Training for freshmen, according to a recommendation made by the Council to the Dean's office. It was felt that the facilities for the game are so limited that a favored group should not be established to the consequent detriment of upperclassmen and Faculty who wish to play.

Professor Sayre Predicts Speech of Near Future

Wilson Compton Outlines Need
For Technical Men In
Review Article

How aeronautical terminology will revolutionize conversational English is humorously described in the leading article of the November Technology Review. Professor Daniel C. Sayre, of the department of Aeronautics, is thoroughly familiar with the jargon of the flying field, for he is himself a pilot. Where once we used the words "surcingle" and "whiffletrees," and now "carburetors" and "differentials," he predicts that these will be succeeded by "ailerons," "pitching moments," and "dihedral angles." Already the expressions, "give it the gun," and "take off" have gained favor.

Professor Sayre explains the mysteries of aeronautical language, which includes "kewee," "zoom," "ceiling," "reving up," "ferrying the mail," "fog factory," "Kansas," "daisy clipping," "tin geese," "barrel roll," "falling leaf," "dodo," "duck," "hedge hopping," "setting it on the deck," and "pushing a crate." Many expressions Professor Sayre cites as being highly descriptive, as "Whistling Bill," "Stuttering Sam," "Andy Gump," "Galloping Goose," "Iron Horse," and "Bath Tub." We consider this amusing article worth the reading, if only to discover the significance of the term "air-cooled teeth."

"Opportunities in Wood Industries"

Dr. Wilson Compton, brother of Karl T. and Arthur H. Compton, contributes to this issue a study of the lumber situation under the heading, "Opportunities for Technically-Trained Men in the Wood Industries." Silviculture, which has declined forty per cent in the last twenty-

Germany Now Facing Revolution P. Porter Tells Liberal Club

Holds Communist Counter Revolt
Will Follow Fascist Coup
Within Year

How Japan was forced into aggression by matters beyond her control, and how Germany is placed upon the verge of a revolution by her economic situation, were related to the Liberal Club by Mr. Paul Porter of the League for Industrial Democracy on Monday. Speaking from knowledge gained first-hand, he told how the imperialistic attitude of the European powers first forced Japan into aggression as a means of self-preservation, and how the pressure of her population has made her seize adequate sources of raw materials.

Mr. Porter pictured a Germany in which the betting odds favor a revolution within twelve months. The growing strength of the lunatic fringes, Fascists and Communists threatens to plunge the country into a civil war. The Fascist coup will probably occur first, followed by a Communist counter-revolt. That the Communists have not attempted a revolution already, he attributes to the Russians. They have held their German comrades in check for fear of precipitating a European war involving the Soviet Union.

Explains Cure

The cure for war, Mr. Porter holds, lies in removing the causes, which are economic. He advocated the international allocation of the world's natural products, and the removal of tariff barriers to end the struggle for raw materials and markets. He also advocated disarmament, psychological, physical, and economic. He pointed out that birth control of guns must precede birth control of babies, since nations now seek adequate "cannon fodder" for their growing armaments. The speaker also expressed a belief that capitalism and peace were not entirely compatible.

One suggested method of stopping war is that of Albert Einstein, who believes that if two per cent of the population in each country will vigorously resist war even after it has been declared, they can prevent this disaster from ever occurring.

SNIVELLING 'SNIQUES SHIVER AS THE TECH ACCEPTS DARE

TICKETS NOW ON SALE FOR MILITARY BALL

Scabbard and Blade Will Hold
Open Affair in Walker

Plans are moving toward completion for the coming Military Ball to be given next Tuesday evening in Walker Memorial by the Scabbard and Blade Society. Tickets are going on sale in the lobby today, and the committee in charge wishes to emphasize the fact that this social affair is not confined to members of the advanced R. O. T. C., but is open to all students.

The Scabbard and Blade Society has made a special effort to secure good music for the occasion and have succeeded in procuring the services of Jimmy Goodman and his orchestra, who have just fulfilled an engagement at the Plantation Club in New York City.

Refreshments Served

The dance will begin at 9 o'clock in the evening and continue until 3 o'clock the next morning. Refreshments will be served later in the evening and a special intermission will be taken at midnight when the tapping ceremony, corresponding to the usual initiation exercises, will be held.

T.C.A. DRIVE NETS \$2,000.00 IN FIRST TWO DAYS ALONE

Fraternities Contribute More
Than Half of Present
Total Amount

THREE DAYS YET TO GO

With forty per cent of the budget already collected at 3 o'clock yesterday the T.C.A. Drive appeared to be meeting with success in spite of the current depression.

Mr. Wallace M. Ross, General Secretary, announced yesterday that \$2022.10 had been contributed in a drive to secure \$5100 for the maintenance of the T.C.A. services during the year. This sum is \$300 more than had been received at the same time last year, but \$500 less than two years ago. More than half of the amount received was from the fraternities. Soliciting was conducted at the fraternity houses last Monday evening and \$1142.60 was collected. Men living in the dormitories have given \$690 and the Free Lancers reported contributions of \$189.50 from the remainder of the student body.

Among the fraternities, the Phi Beta Epsilon house is leading with a rating of 11.0. The leading dormitory is Crafts with a rating of 3.6. Ratings are computed by dividing the total received by the number of men in the fraternity or dormitory.

Gift of \$100

One gift of \$100 was received, which is the largest contribution received since 1922. One man gave \$50 and three others gave \$25 each.

The drive, which is being conducted by 194 undergraduates, will close next Friday. It is expected that contributions from the men living in the dormitories and from

NEWSIES TO MINGLE GORE AND GLORY IN UTTER PROFUSION

Newsroom Squad Prepares To
Do Up Foes After Fashion
Of Roman Holiday

In its long and checkered career the Technology Year Book has made many mistakes, but they have pulled their supreme boner when they summoned up enough courage to challenge the mighty warriors of THE TECH.

It is but human to err, 'tis quoted, and the "Sneakers" should thank their stars that their office is located on the opposite side of Walker basement from THE TECH newsroom. As this article is being written, their teeth can be heard chattering with fright.

A poster was put up by night, we think, in which a football game was proposed between the two publications. Not being content with the drubbing (12-0) given them last year by the ferocious newsmen, the apprehensive year book snapshots again throw down the mitten on the field of honor.

Tremble, you trembling Techniquers;

Dramashop Reports Completed Casting Of All Male Parts

Lead Part Goes to Kidde. Six
Feminine Roles Still
To Be Filled

As a result of recent trials, Dramashop has, with a few exceptions, chosen the members of the cast for its first production of the year, "Mr. Antonio." All the male parts have been filled, but there are six feminine parts yet to be allotted, with seven co-eds trying for them. These parts will be disposed of within a few days, making the cast complete.

The lead of the play has been given to Gustave E. Kidde '33, who takes the part of Mr. Antonio, a comical gentleman of slightly foreign extraction. Other characters include The Reverend Walpole, played by Irwin E. Hattis '34; George, chief of police, taken by Carson L. Roberts '35; Tug, by Norman M. Johnson '34; Joe, a slow-witted comedy part, by J. Cobham Noyes '32; Earl, by Charles W. Ball '34; Mr. Jory, by Henry A. Cashman '34; and Pearl, a hard-boiled young lady, by Virginia Davidson '34.

The six feminine parts not yet given to anyone will be divided between Miss Ullman '35, Priscilla Bacon '34, Isabel Ebel '34, Genevieve Kittinger '34, Helen Moody '31, and Hazel Weld '34. As the result of the first few rehearsals, the first of which was held Thursday night at 7 o'clock, the parts as yet unfilled will be selected. Rehearsals are to be held twice a week from now on.

Malvin Mayer '33, rehearsal manager of the Tech Show last year, has indicated his willingness to work with the Dramashop. No definite assignment has been made for him. Others will be interested to know that there are still several positions open on the managerial side. Anyone desiring to try for them should see Noyes or Professor Dean Fuller in Room 2-176.

WALKER MEMORIAL WILL BE SCENE OF FORMAL FUNCTION

Three Undergraduates Are to
Present Solo Numbers
At Concert

TICKETS IN MAIN LOBBY

Final arrangements for the Combined Musical Clubs Fall Concert and Dance, the first sponsored by them in a number of years, have been completed. The affair, the first of a group of formal functions at the Institute this fall, will be presented in the Main Hall of Walker Memorial at 8.30 o'clock on Friday evening. Immediately following the concert, the floor will be cleared for dancing, which will continue from 10 to 1 o'clock. Refreshments are to be served during the intermission at 12 o'clock.

Mrs. James R. Jack, wife of Professor Jack of the Marine Engineering Department, Mrs. Robert P. Bigelow, wife of Professor Bigelow of the Department of Biology, and Mrs. William T. Hall, wife of Professor Hall of the department of Chemistry, have kindly consented to act as chaperones. Professor Hall will also attend as a Faculty member of the Baton Club, the Technology honorary musical society.

Fine Specialty Numbers

Some unusually fine talent has been unearthed amongst the undergraduates by the clubs. These men will present sev-

Open Handicap Meet For All Candidates Lists Eleven Events

List of Entries Still Small But
Many Expected to Compete
at Meet Saturday

Saturday afternoon all the track men in the Institute will have a chance to participate in a meet among themselves, beginning at 2.30 o'clock. Eleven events will be run off, in the course of the afternoon including some from every division of the sport, to give men in each department a workout.

Both Coach Hedlund and Coach Bowie will be on the field to offer suggestions, and they will officiate. Among the field events there will be the discus, the hammer, the pole vault, and the high jump. For the track events, Oscar Hedlund has followed his usual rule for the handicap meets, and included as many of the freak variety of races as is possible to remain in keeping with the idea of running the men from all the events in a regular meet.

This week the running events will include the 90-yard dash, the 150-yard dash, the 440-yard run, the three-quarter-mile run, the two-mile run, the 120-yard low hurdles, and the 60-yard high hurdles.

Freshmen May Run

As yet, there have been very few men signed-up for the meet, and both of the coaches are desirous of having as many as possible out. It is not necessary to sign up to compete, but is requested, in order that the managers know what size affair they will have to plan for. All the freshmen who are out for track in lieu of taking P. T. are eligible to run in this meet, and they will have just as good a chance to win their events, as the most experienced varsity man, as the judges will attempt to assign handicaps which will make each of the competitors equally dangerous to the others.

OPEN FORUM

To the Editor of THE TECH:

In the belief that your recent outburst entitled *Inertia* was intended as an energy-saving means of rooting out copy to fill the space not taken up by advertising in your newspaper, my first inclination was to ignore it entirely.

However, for the benefit of some who may be living under the misapprehension that everything in the line of student activity is going to rack and ruin about the Institute, I shall attempt to disclose what Dorclan is, and what it is not.

In 1924 a group of upperclassmen met with the idea of forming a society in the Dormitories, and a constitution was drawn up. At that time the society was felt to be unnecessary and it was feared that a select group of that type might mean the return of a fraternal organization to the Dorms. The latter the Institute was trying to avoid. For these reasons the organization disbanded.

The advent of the spring of 1927 brought together a group of conspicuous Seniors who discussed the formation of a Dormitory honorary society. The old constitution was resurrected, revised and presented at the organization meeting held Thursday, May 5, at which time it was unanimously adopted. Officers were elected and the name Dorclan was adopted at a meeting on the ninth of May. Dorclan has been in active existence since then and has in a quiet way been a guiding force behind Dorm athletics, the Dorm Run or (now the official Dormitory newspaper of four pages, issued once a week), Dorm dances (the first of which was held last

Friday evening, with an attendance of three hundred couples and which strangely enough, was not covered by your very active staff), and all other important activities, including the Institute Committee itself.

Consider that there are six hundred and fifty men in the Dormitories and that a continuous program of athletic contests, dances, and other get-togethers are arranged for their amusement as well as to foster a general feeling of good-fellowship among the men, and then try and conceive of this being effected with no guiding influence other than the Dormitory Committee, which consists of one man from each hall.

That added influence is Dorclan, to membership in which are elected those men who have proven active in Dormitory and Institute activities.

The Preamble of the Dorclan Constitution which is given below is, I believe, self-explanatory. I hope I have conveyed to those, ignorant of what Dorclan is, a little of, "What function this society performs," and I leave it to the residents of the Dor-

mitories, "what tremendous amount of good is done."

Preamble: Whereas it seems fitting to reward those residents of the Dormitories who have rendered distinguished service in Dormitory and Institute life, let it be known that we, the undersigned residents of the Dormitories, do hereby organize a society to honor those students who have contributed to the furtherance of activities and good fellowship, and who have, by this endeavor, materially benefitted the Massachusetts Institute of Technology, the Dormitories, and themselves.

Sincerely yours,

BRUNO H. WERA '32

President of Dorclan.

LEADERS WANTED

NO undertaking may hope to be successful unless it has been planned and outlined by a group of interested men, and managed by a body which is wholly interested in the project. Open House Day is a project which has been included in the Institute program for several years, and its success has reached greater proportions with each annual repetition. Last year this event was placed in the hands of the student body which, acting through some twenty odd representatives, assumed the entire responsibility of the affair. Student capability and interest was apparently proven for all time by the success of last year's Open House Day.

The Executive Committee of the Combined Professional Societies, consisting of a group of men selected from the various Professional Societies, has had in the past some share in the organization of Open House. Last year, the members of this committee approached the Faculty Open House Committee and pleaded that the students either be given full charge of the affair, or that they be left out entirely. They were in no way willing to remain only half responsible. The Faculty Committee immediately voted that these students be allowed full power in the running of Open House, believing that the willingness to take these duties indicated ability to carry through the event in the most satisfactory manner.

Whether or not this change in management is to become a precedent is questionable. Open House Day is an event which certainly benefits the school and the student body in many ways, and its entire operation depends upon efficient and executive management. It is necessary to gain the cooperation of so many different units, to plan for so many different exhibits, and to draw upon so many differing interests, that the leaders in charge of the affair cannot contribute only a portion of their enthusiasm. They must be willing to enlist their every energy in planning and supervising.

The present Executive Committee of the Combined Professional Societies met a week ago and discussed this matter to great extent. When the matter came to a vote, the body was equally divided as to whether or not it should manage Open House Day this year. As only half of the members were present at this meeting, we cannot assume that vote to be final and binding, but it would seem to indicate considerable unsteadiness. In light of this, does it seem feasible to intrust this body with the responsibilities of Open House?

We have stressed that the whole-heartedness of every member of this body is absolutely essential for the success of Open House Day; any great amount of dissent will soon kill the issue. The Executive Committee of the Combined Professional Societies meets again in the very near future, and it is faced with a very delicate decision.

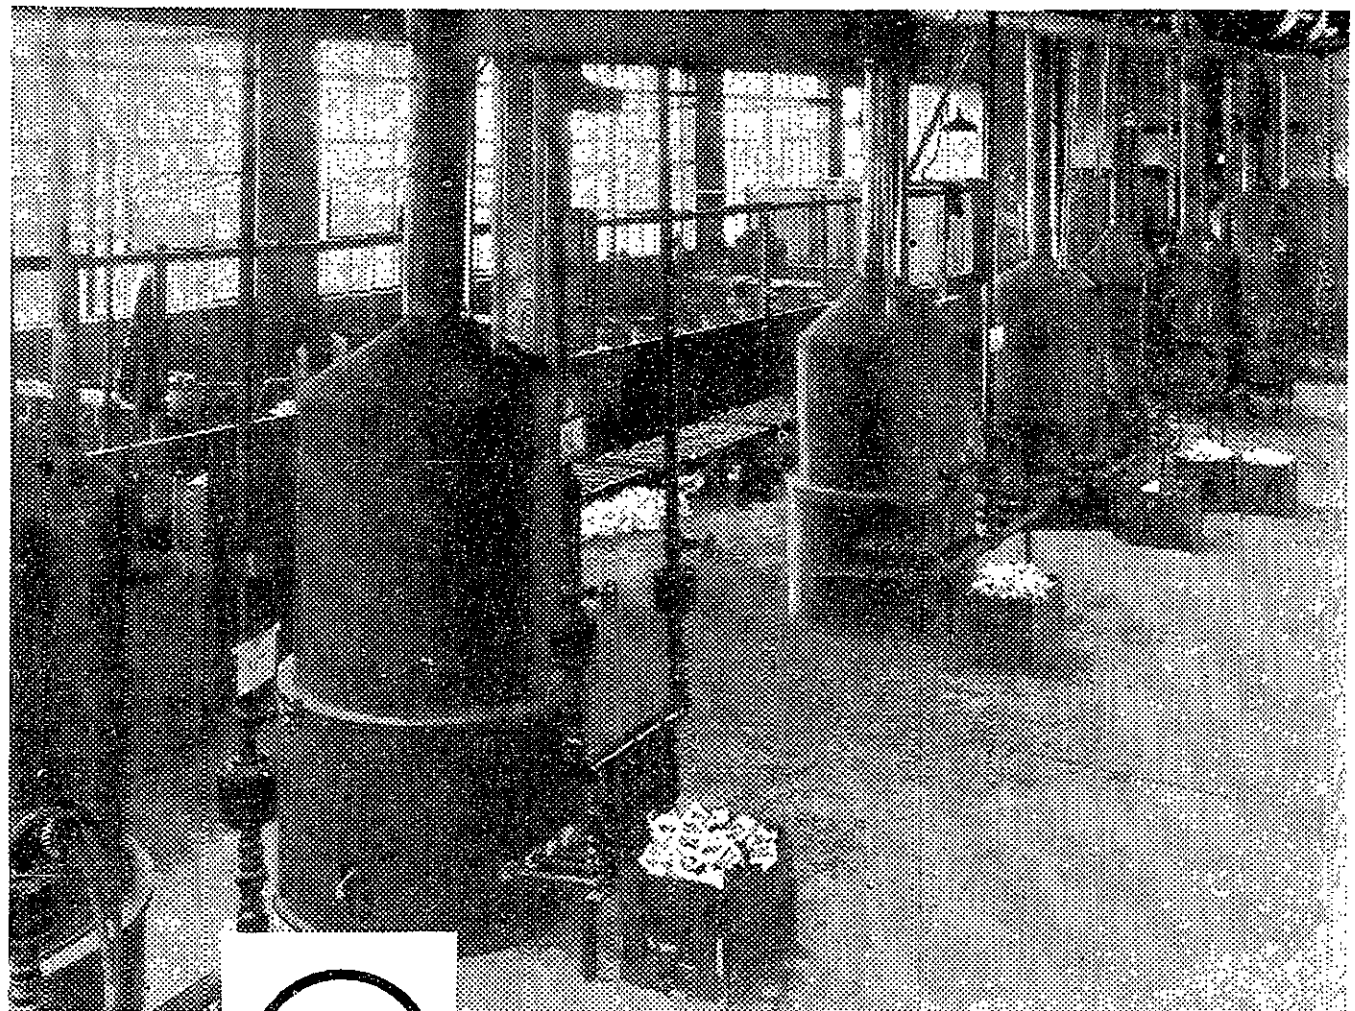

MORE VOICES

THERE are many honorary societies at Technology which assert themselves to be active, but which define their activity relative to a traditional standard. In other words, a club's usefulness may be apparent only to itself, even when it functions with its greatest enthusiasm. However, this does not excuse the greater number of these societies from rising in self-defense.

The "Open Forum" column today contains more letters in answer to our editorial *Inertia*. We are somewhat pleased to discover that Baton has its share of loyal supporters; men who are willing to voice their opinions publicly. The society itself is obviously held together by unselfish ideals and purposes. Dorclan, according to its president, is also an active organization, and in spite of his poor attempt at sarcasm, we would honor his plea. Certainly the provocation of good fellowship in the dormitories is a worthwhile purpose if adhered to faithfully.

There are, however, several more honorary societies which have remained stubbornly silent. We had hopes that many of these, by this time at least, would have amassed enough energy to respond to our prodding.

GAS HEAT FOR SOFT METAL MELTING

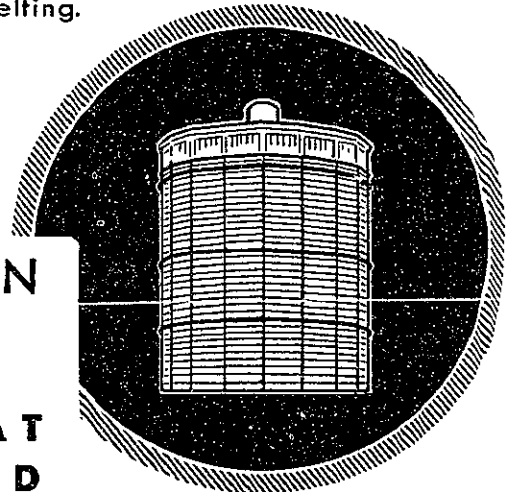

G

AS provides the best possible heat for soft metal melting operations: it quickly attains the proper thermal head, and—what is at least equally important—it maintains it with a tolerance of but a few degrees. The new book "Gas Heat in Industry" contains definite information about the application of gas to soft metal melting. You should have a copy.

**GAS FOR HEAT
WHEREVER HEAT IS NEEDED**

UPSETS FEATURE QUARTERFINALS OF FALL TOURNAMENT

Ross and Feustel of Seeded List Eliminated in Match Play

REGAN AND HANLEY WIN

Upsets in the seeded list featured the play in the quarter-finals of the fall tennis tournament. Two seeded players, H. F. Ross and Capt. Fred Feustel were retired from the tournament by strong opponents. Eliminating Feustel in straight sets, W. E. Howard played a good brand of tennis, so that there was not much doubt as to whom was the better player. The scores of the sets were 6-2, 6-2. The match was a nice, fast brand of ball, much closer than the scores might indicate. Feustel was having quite a bit of difficulty with a usually good serve.

Ross Loses

H. F. Ross, seeded No. 1 in the tournament, and K. Koerner battled three sets before Koerner won. The match was started twice, with the first time giving the result of a set apiece. When the match was commenced again, the players agreed to start again, with the result of a 6-3, 2-6, 6-3 victory for Koerner. This was quite an upset in any of the predictions that were floating around early in the tournament.

Only one match went quite as expected. Tommy Regan, ranking No. 2, eliminated Charley Feuchter, a member of the frosh team last year. Feuchter had been playing nice tennis in tournament until this match, but both he and Regan only got off rather poor tennis. Regan was finally successful in the match after a rather long two sets, 7-5, 6-2.

Eder Defaults to Hanley

Dick Hanley, No. 4 player, advanced to the semi-finals by virtue of a default from Jim Eder, after two attempts to play the match. Both times the match ran out for quite a while, with the result that darkness halted the first attempt, and rain the second. The players were even when they finally were forced to stop, with the score 7-5, 5-7, Hanley winning the first set. After the play, Eder defaulted the match to his opponent.

These victories bring together a promise of good battles in the semi-final round, with Regan opposing Howard, and Hanley and Koerner mixing. By virtue of his defeat of Feustel, Howard might be favored to win the first match, while the second is anybody's.

Howard, by the way, is an experienced player, with three years of experience at Navy behind him. He ranked first on the team, and following his graduation three years ago, coached the game at Navy. This is his first participation against any Technology talent.

SPORTS DESK

After one hard night's training, the Nichols gang went across the river and beat Sigma Nu in a loose and sloppy game of tackle football, to the score of 6-0. Neither side was in very good shape, but during the greater part of the game the fraternity men seemed to have the edge on the Dorm squad. This showed up in the yards gained, and was visible to any bystanders.

Scoring for both sides was limited to the intercepted pass which Brosnahan of Nichols pulled down, and ran off with for the touchdown.

The Greeks still think that they were reamed for the score as the whistle had blown for off-sides before the play had started. The fraternity was in possession and also was the offender, and as the play was completed, the dorm men had the chance of taking the play or the penalty. There was not much hesitancy in their decision.

Musical Clubs Give First Concert and Dance Next Friday

Three Undergraduates Are To Present Solo Numbers At Concert

(Continued from Page One)

eral solo offerings between the programs of the four regular clubs.

Tickets for the concert are on sale in the Main Lobby every day from 12 to 2 o'clock. The sale of tickets will continue to and including Friday in order that everyone may have the opportunity of obtaining his. All members of the Combined Clubs will also have them for distribution to anyone desiring them. Arrangements have been made by the management to have tickets for purchase at the door for the convenience of those who do not get theirs beforehand. The subscription price will be two dollars and fifty cents a couple, including the refreshments to be served during intermission.

The Program

A widely varied program, which follows in detail, will be presented by the Clubs:

Banjo Club

"Longing for You" A. J. Weidt
"The Darkies' Patrol" G. L. Lansing
"Green City" A. J. Weidt

John Sloat

Vocal Solo Accompanied by Ivan Getting

The Technicians

A group of popular selections.

Glee Club

"On Wings of Song" Mendelssohn
"Lullaby" Brahms
"Song of the Jolly Roger" C. F. Chudleigh Candish

Merton S. Neill

Xylophone Solo
Accompanied by Harold Traver

Instrumental Club

"Mignonette" J. Baumen
"Plaisir d'Amour" G. B. Martini
Overture "Lustspiel" Keler-Bela

Ernest Spannake

Cello Solo
Accompanied by Helmut Seifert

Glee Club

"Take Me Back to Tech" I. W. Litchfield
"A Stein Song" F. F. Bullard

MENORAH MEETS WITH SIMMONS THURSDAY

Marking the first of a series of combined meetings with other chapters which proved so popular last year, a combined meeting of the M. I. T. Menorah Society with the Simmons Chapter of the same organization will be held at North Hall, Walker Memorial Building, this Thursday evening. At the conclusion of the introduction, dancing will be enjoyed by the members. The time scheduled for the affair is from 8 o'clock to 12 midnight.

Monday noon found four erstwhile Nichols football players in the Infirmary, getting X-rayed. All but one of the injuries proved to be superficial, after the pictures.

Oscar Hedlund's comment on the rather impromptu game was, "The . . . fools, to play tackle football while they are in condition for something about as strenuous as backgammon."

Dan Emond's ankle seemed to have a chip taken off of it in the X-ray examination. Such a thing would have to happen the day before the first basket ball practice.

Having the president of the Institute play a game or two of squash has proved a boon to the promotion of the game's popularity. It has been worth a man's life to try and get a court for a playable hour ever since the boys had such a good example set them.

OPEN FORUM

(Continued from Page Two)

To the Editor of THE TECH:

In order to amplify Mr. Poor's assertions in his letter of November 2 to THE TECH, I feel that a word from the General Manager of the Musical Clubs in regard to the status of the Baton Society as an aid to the welfare of the Musical Clubs, is necessary.

In my opinion, Mr. Poor has not put enough emphasis on the valuable aid which the Baton renders each year to the Combined Musical Clubs. This organization has without doubt been the only means by which the Clubs have been held together during these years in which concerts are few and far between. It is the nucleus upon which the organization and the morale of the Clubs depends. It is the means by which the managing boards are enabled to determine the attitudes of the various clubs toward the proposals advanced by the management. It is during Baton meetings that the coming events and the problems are discussed and recommendations made for their solutions to the management. In this manner the Baton fulfills its function as an advisory board.

In order to illustrate the splendid spirit and live-wire attitude of the Baton Society, an example is necessary. At the last meeting of the Society, held at the Phi Mu Delta house on October 28, twenty of its twenty-one undergraduate members were present, also three Alumni members and two honorary members, one of whom is a member of the Faculty. I doubt if any other organization, honorary or otherwise, has an attendance which can compare with this. Moreover, these meetings are not of the type which begins with the reading of the roll, followed by a motion to adjourn. They are filled with action from beginning to end, and everyone is willing and pleased to express his own opinion upon subject under discussion, however radical his point of view may be. Thus it is, through the agency of this organization, that the management, who have no intimate connection with the various clubs, are able to render the greatest possible service to all.

CHALLENGE OF YEAR BOOK IS ACCEPTED

THE TECH Prepares to Clean Up Field with 'Sniques

(Continued from Page One)

tremble some more. And come out of the closet where you are hiding and listen thusly: Your challenge will be answered. A football team, made up of stalwart and husky reporters and writers and business men is now far on the way toward completion. Out of the forty or more men who have come out for the newbies' team only five at most will be required, it being felt that this number should be adequate to handle the entire Technique staff, and the rest have been put to gnawing bark off the poplar trees and to pushing Mack trucks up the incline of the new building in order to work off the excess energy and ferocity.

The superb workings of the team from THE TECH is watched from all corners of the nation. All coaching is being done by correspondence, a round dozen of the most famous coaches in the East and Middle West fondly hoping to see their theories work out with clockwork precision as the wild men of THE TECH push their weaker and less courageous opponents down the field, across the Boston and Albany tracks on one end and into the Basin on the other.

So untamed and wild are the men who are out for the paper's team that they are

In conclusion, let me say, if there were more "DEAD" societies like Baton, the various activities of the Institute would find themselves in a much better position to fulfill the functions for which they were instituted.

Yours very truly,
(Signed) EUGENE F. LYNCH '32.

PROF. SAYRE WRITES IN NOVEMBER REVIEW

(Continued from Page One)

five years, is faced at the present day with tremendous competition that necessitates not so much business as scientific and engineering methods. Dr. Compton, who is Secretary and General Manager of the National Lumber Manufacturers Association, presented this paper recently to the Combined Professional Societies in order to emphasize the increasing demand for the technical man in the industry in which he is so interested.

The Review fortunately obtained permission to reprint "Benjamin Thompson: Count Rumford," by Richard W. Hale, in the November number. This short treatment of the life of one of the heroes of science is exceedingly entertaining and especially timely, since President Compton has lately received the Rumford medal, an award to the authors of the most important and useful discoveries and improvements in light and heat in any part of North America or in any of the American islands.

The remaining feature of the review include the tabular view and the Trend of Affairs. Of particular interest are communications from Professors Norbert Wiener and Tenney L. Davis, who are travelling abroad. Both of these men promise monthly letters, to be published in subsequent issues of the Review.

fed nothing but raw beef and tiger's meat and are allowed nothing but blood and nitroglycerine to drink.

It is hoped among the members of THE TECH that a football team will show up on the fateful day of carnage, November 14, to be fed as victims to the five man-eaters. Football players are their dish.

To MEN only!

NO NEED to park a "Girls Keep Out" at the top of this advertisement. They'll shy off quick enough when they find out what it's about.

For it's a strictly masculine privilege—solace, satisfaction, retreat, call it what you will—the joy of smoking a pipe!

It's the smoke "for men only," any girl will agree—one of the few rights the women haven't crowded us on. And the only smoke for men, many a thoughtful smoker calls it. For the deep consolation and rare comradeship of a mellow, richly aged pipe are something every man does well to know.

And you taste the rich satisfaction of pipe smoking at its best when you fill up your bowl with Edgeworth. There's a tobacco that's made for a pipe. Cool, dry, slow-burning. Blended of fine, mellow, full-flavored burleys.

You've a rare smoke coming if you've never tried Edgeworth. You will find Edgeworth at your tobacco dealer's. Or send for special free sample packet if you wish. Address Larus & Bro. Co., 105 S. 22d St., Richmond, Virginia.

EDGEWORTH SMOKING TOBACCO

Edgeworth is a blend of fine old burleys, with its natural flavor enhanced by Edgeworth's distinctive and exclusive elevation process. Buy Edgeworth anywhere in two forms—Edgeworth Ready Rubbed and Edgeworth Plug Slice. All sizes. 15¢ pocket package to \$1.50 pound tumbler tin.

T. C. A. DRIVE NETS \$2,000 FOR START

(Continued from Page One)

those who commute will have greatly increased by that time. Buttons bearing the letters "TCA" are being given to those who contribute, to save them the annoyance of being approached after they have given, and to reduce the work of the drive workers. This is the first time in four years that the buttons have been used.

Members of the Faculty may contribute at this time if they so desire, but another drive among the Faculty members will be conducted in February.

The Columbia Spectator, daily student publication at Columbia University, published in its first issue this year a welcome to new students in Yiddish, Italian, Latin, Spanish, German, French and incidentally English.

THE TECH Publishes

Field Day Pictures Friday

Don't fail to secure the Field Day rotogravure supplement which will be given complimentary with the regular edition of THE TECH on Friday. This pictorial section will contain pictures of Field Day teams and events as well as several remembrances of freshman Camp activities.

SEDGWICK BIOLOGICAL SOCIETY

There will be a meeting of the Sedgwick Biological Society in the Emma Rogers Room of the Institute on Wednesday, November 4, 1931, at 7.30 o'clock in the evening. There will be a short business meeting, followed by a talk by Professor Prescott, on "William Thompson Sedgwick." A social hour will follow.

FRESHMAN TRACK

Freshmen who have signed up for track in place of P. T. 1, must report three times this week. Report to Oscar Hedlund in the track house, and come prepared with roll cards.

TAU BETA PI SMOKER

Tau Beta Pi will give a smoker in the Faculty Dining Room of Walker Memorial on Thursday at 8 o'clock for all eligible men. Invitations have already been mailed on Tuesday. Professor Edward P. Miller will be the speaker of the evening.

As We Like It

Plymouth

In three acts of wonderfully-staged drama, the Professional Players opened a month's engagement of "The House Beautiful" at the Plymouth, Monday evening. Depicting the married life of Archibald and Jennifer Davis from the beginning of the twentieth century down to the present, the play shows the Golden Rule integrity of Archibald during the gradual growth of his ideal and the small town he has chosen as a home.

Presented on a revolving stage that operated more smoothly and with less noise than any one it has been our privilege to see before, the scenes were changed with a rapidity that added much to the pleasure of watching the play.

The patient Jennifer, after the death of Archie, which occurs in the last act, realizes that his passing is a mere transition and that she, too, will soon pass to her idealized lover and their ideals.

James Bell, as Archie, gives a fine interpretation of the modern Galahad, while Mary Phillips ably backs him as Jennifer, his wife. They are supported by an excellent cast.

D. H. C.

Colonial

"Tomorrow and Tomorrow," at the Colonial, provides an evening's entertainment of good acting of what seemed to be a rather mediocre play. Taking the part of the professor who visits at the home of the Redmans, recognizes that he and Mrs. Redman "are made for each other," and then returns in the last act to cure the child born of their love, Glenn Anders gives the best performance.

Zita Johann, as Eve, the wife of Gail Redman, closely follows him and gives a good rendering of the childless wife who lacks something to keep her interested in life. The better part of her work was in the first act. Harvey Stephens, playing the part of Gail, conveys the enthusiasm of the young business man who is intensely interested in some to him very enjoyable hobby. It may be difficult to give good interpretations of children, but even so, we thought the part of Christian Redman poorly done.

B. W.

"It's a Truly Modern Cigarette"

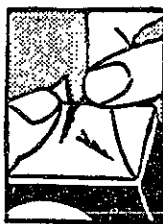

"I'm certainly grateful for Lucky Strike. It's a truly modern cigarette for it gives me modern throat protection. And your improved Cellophane wrapper is wonderfully modern, too. It opens without any coaxing — a flip of the little tab and there are my Luckies."

Loretta Young

A famous and beloved picture star while still in her 'teens—blessed with breath-taking girlish beauty—could fate have been kinder to Loretta Young? She's the very incarnation of young loveliness. If you have not seen her in First National's "Ruling Voice," do so.

That LUCKY tab! Moisture-Proof Cellophane. Sealed tight—Ever right. The Unique Humidor Package. Zip — And it's open! See the new notched tab on the top of the package. Hold down one half with your thumb. Tear off the other half. Simple. Quick. Zip! That's all. Unique! Wrapped in dust-proof, moisture-proof, germ-proof Cellophane. Clean, protected, neat, FRESH!—what could be more modern than LUCKIES' improved Humidor package — so easy to open! Ladies — the LUCKY TAB is — your finger nail protection.

"It's toasted"

Your Throat Protection — against irritation — against cough

And Moisture-Proof Cellophane Keeps that "Toasted" Flavor Ever Fresh

TUNE IN—The Lucky Strike Dance Hour, every Tuesday, Thursday and Saturday evening over N.B.C. networks

★ Is Miss Young's Statement Paid For?

You may be interested in knowing that not one cent was paid to Miss Young to make the above statement. Miss Young has been a smoker of LUCKY STRIKE cigarettes for 4 years. We hope the publicity herewith given will be as beneficial to her and to First National, her producers, as her endorsement of LUCKIES is to you and to us.

Copyright, 1931, The American Tobacco Co.

Made of the finest tobaccos—the Cream of many Crops—LUCKY STRIKE alone offers the throat protection of the exclusive "TOASTING" Process which includes the use of modern Ultra Violet Rays—the process that expels certain harsh, biting irritants naturally present in every tobacco leaf. These expelled irritants are not present in your LUCKY STRIKE. "They're out — so they can't be in!" No wonder LUCKIES are always kind to your throat.
